Title:　　　　　CU Connect - A networking website for CU students and alumni
Description:　　A social networking website comprising of a front end and back end systems. A backend database will keep a record of all the information of the users. We will focus on 2-3 users and 1 admin initially but this should be extendable.
Actors:　　　　admin, users
Functionality:

1. Users can signup with CU emails
2. Users can login
3. Users can update their profiles with information
4. Admin has elevated privileges to monitor content
5. Admin can change settings of users
6. Users can add each other as friends
7. Users who are friends can share photos among themselves
8. Other users can ThumbsUp or ThumbsDown
9. Users can create Events
10. Users can add comments

Stretch goals

1. Users can form groups
2. Users can chat with each other
